

fibermaz

Manufacturer of electrical insulation

G11,G10,HGW,fiberglass
epoxy,FR4,GPO3

**Production of
sheets,tube,rods,molded parts**

- **Thickness:from0.5mm to 400mm**
- **Length: up to 3200mm**

sale:0060-1172215594

Applications of Epoxy Fiberglass Washers, Tubes, and Rods in Dry-Type Transformers

- * Electrical insulation
between conductive
components**
- * Mechanical support and
reinforcement of
transformer structures**
- * Coil clamping and winding
support systems**

- * Insulation of fastening bolts
and hardware**
- * Fabrication of insulating
spacers and barriers**
- * High-voltage insulation
applications**
- * Resistance to heat, moisture,
and electrical stress**
- * Use in busbar support and
insulation systems**

Applications of HGW Epoxy Fiberglass Laminates in Dry- Type Transformers

HGW epoxy fiberglass laminates are widely used in dry-type transformers due to their excellent electrical insulation properties, high mechanical strength, and thermal resistance

- **Typical Applications:**
- **Insulation rings**
- **Coil support structures**
- **Insulating spacers**
- **Air ducts and cooling channel components**
- **Insulating washers**
- **Busbar support parts**
- **Clamping and fastening components**
- **High-voltage insulation barriers**
- **Structural insulating components**
